

## OHPCC Resource Library

Collection of useful resources used in the care coordination of Oregon clients.

- The Provider Directory is a comprehensive list of providers by county which includes contact information, specialty, coverage availability and hours of operations.
- The OHSU Provider List is a subset of the Provider Directory, but only focuses on the OHSU health system.
- Hospital Contact List is a list of all the hospital within Oregon and their current contact information. This is used during the Hospital Census referral process by Care Coordinators and Health Coach Staff alike.
- The Useful LINKS are web based resources and a hot link is used for quick access.
- Each Resource Folder Category below contains many separate pieces of information that is filed into the library to easy use by staff while assisting clients with his/her needs. This is a fluid list that is updated in an ongoing manner when new resources are identified, or current resources are updated.
